DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 1/29/09 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of patent #6,617,674 has been reviewed and is accepted. The terminal disclaimer has been recorded and the previous double patenting rejection is withdrawn.

Allowable Subject Matter

2. Claims 1-24 are allowed. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the claims listed above in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper.

The prior art fails to teach a combination of all of the features in claims 1 and 2. In particular, Kato et al. (US 2004/0241927) teaches step (i) of claims 1 and 2 as well as heating and curing the substrate but does not teach etching or removing part of the substrate. The purpose of fabricating, heating and curing the silicone composition of Kato is for encapsulation of a semiconductor device. Therefore, it would not be obvious to etch or remove portions of the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Plueddemann (US 3,889,023), Chen et al. (US 6,503,847) and Brady et al. (US 5,389,170) teach Organosiloxane compositions for use with semiconductor devices.
